## robbery

Posted by ops - 2008/09/23 06:48

---

Came to know last weekend, in Zone M, a house was broken into at 530am. No lock broken, somehow they have the instrument to unlock. Very professional. Left and robbed another house in the same area. Always have your gated locked and main door (grilled) closed while attending gardening. Once they enter, you can't escaped, and they place a parang on your neck and threatened your family members in the house to open the door. If you don't open the door, they will slash the victim or even chop the hand. So guy out there, inform your family members.

We really need to do something to curb crime in our area. Sri Petaling Residents Association need to come up with some security plan.

Suggestion : Centralized CCTV / Area watch / More Security booths.

We need to be able to walk atleast within our streets with peace of mind.

haiz.... malaysia's police hopeless la  
polices no power~  
must be full charge

The least we can do is pay the security guard service. I'm not saying that their service can be 100% useful but that's the least we can do.
